

Edapt Anatomy and Functional Roles of the Different Type of Blood Vessels quiz

Anatomy and Physiology III with Lab-Holsey > Unit 3

1. Which major category of tissues is ideal for lining and covering structures?
 - a. Nervous tissue
 - b. Epithelial tissue
 - c. Muscle tissue
 - d. Loose connective tissue
 - e. Dense connective tissue
2. Which form of membrane movement is ideal for the diffusion of gases?
 - a. Secondary active transport
 - b. Facilitated channel diffusion
 - c. Primary active transport
 - d. Simple diffusion
 - e. Facilitated carrier diffusion

3.

Determine if the characteristic best describes elastic arteries or muscular arteries.

4. Match the capillary to its description.
