

## Edapt Lymph and Lymphatic Vessels quiz

Anatomy and Physiology III with Lab-Holsey > Unit 4

close

1. What is the major component of blood plasma?
  - a. Albumin
  - b. Fibrinogen
  - c. Water
  - d. Thrombocytes
  - e. Erythrocytes
2. Interstitial fluid is ANY extracellular fluid that is not found in blood.
3. Place the following steps of lymphatic flow in the correct order beginning with the interstitial fluid and ending with the blood vessels.
  - a. Interstitial Fluid
  - b. Lymphatic Capillaries
  - c. Lymphatic Vessels
  - d. Lymphatic Trunks
  - e. Lymphatic Ducts
  - f. Subclavian Veins
4. Place the steps in the lymphatic pathway in the correct order.
  - a. Lymphatic capillary
  - b. Afferent lymphatic vessel
  - c. Lymph node
  - d. Efferent lymphatic vessel
  - e. Lymphatic trunk
  - f. Collecting duct
  - g. Subclavian vein
5. Lymph from the head and neck drains into the \_\_\_\_\_ trunk.
  - a. jugular
  - b. bronchomediastinal
