

# Edapt Introduction to the Immune System

Anatomy and Physiology III with Lab-Holsey > Unit 5 quiz

- How many specific lines of defense are formed by our immune system?
  - Four
  - One
  - Two
  - Three
- What are some of the names of non-specific immunity? Select all that apply.
  - Genetic immunity
  - Inborn immunity
  - Innate immunity
  - Adaptive immunity
- Innate defenses are:
  - fast and non-specific.
  - fast and specific.
  - slow and non-specific.
  - slow and specific.
- A child has scratched their knee while playing football, which line of defense is compromised, and which do you think will activate first to provide protection:
  - first line of defense, third line of defense
  - first line of defense, second line of defense
  - second line of defense, third line of defense
  - third line of defense, second line of defense
  - third line of defense, first line of defense
- Select all that apply. Identify the characteristics of the non-specific immune system:
  - innate
  - fast-acting
