

Computer Tasks

1. Review the backup options for your operating system and provide evidence of it being enabled for your system with a screenshot

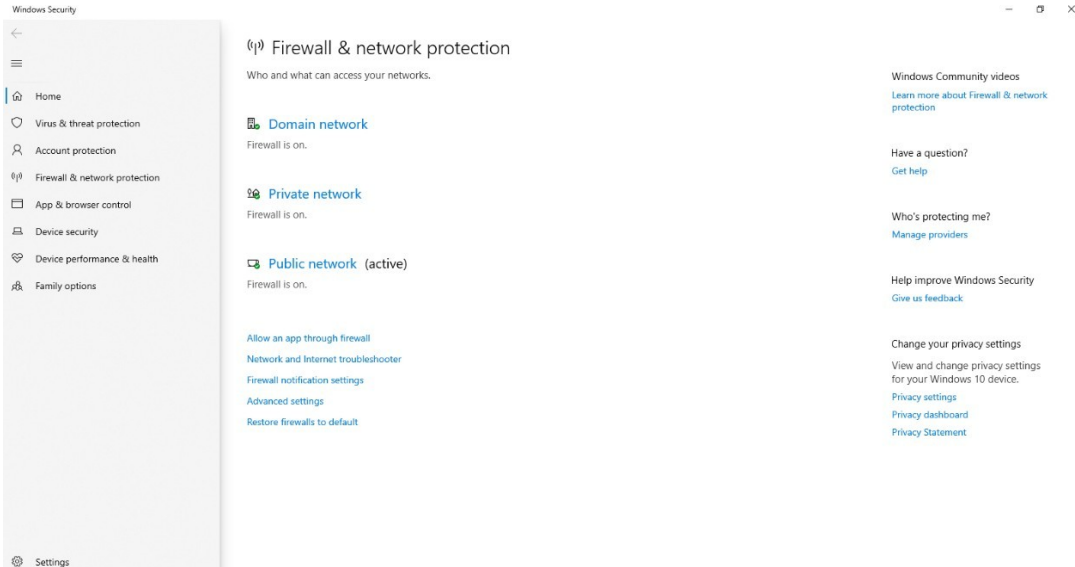

2.

The screenshot shows the Windows Settings application with the 'Backup' page selected. The left sidebar lists various settings categories, with 'Backup' highlighted. The main content area displays 'Back up using File History', explaining that it backs up files to another drive and allows restoration. It includes an 'Add a drive' button and a 'More options' link. Below this, there is a section for 'Looking for an older backup?' with instructions for users who have used the Windows 7 Backup and Restore tool. The right sidebar contains links for 'Choose the right backup option for you', 'Help from the web', 'Get help', and 'Give feedback'. The task number '2.' is positioned to the left of the screenshot. The text 'Open the' is written vertically on the right side of the screenshot.

Open the

firewall system and take a screenshot showing that it is enabled

The screenshot shows the Windows Security application with the 'Firewall & network protection' page selected. The left sidebar lists various security settings, with 'Firewall & network protection' highlighted. The main content area displays the title 'Firewall & network protection' and the status 'Who and what can access your networks.' It lists three network profiles: 'Domain network', 'Private network', and 'Public network (active)', all with the status 'Firewall is on.' Below this, there are links for 'Allow an app through firewall', 'Network and Internet troubleshooter', 'Firewall notification settings', 'Advanced settings', and 'Restore firewalls to default'. The right sidebar contains links for 'Windows Community videos', 'Have a question?', 'Who's protecting me?', 'Help improve Windows Security', and 'Change your privacy settings'. The task number '2.' is positioned to the left of the screenshot.
