

## **NR 360 Week 8 Team Presentation**

This week, one member of your team will be responsible for posting your team presentation to this discussion thread under the color-coordinated thread below that corresponds with your team.

1. Critique a team presentation other than your own, and include what the presentation taught you and what you see as far as its effect on patient safety and healthcare technology.
2. What changes in the presentation would you recommend, and why?
3. Ask questions! Each team is responsible for responding to questions asked of its presentation!

Remember to include sources of literature in your posts to back up the statements you make! Remember, we are all about evidence-based practice!

This is a short week, and you still must have at least two posts on 2 different days this week.
