

Discussion Questions

You must access the following article to answer the questions:

Baker, N., Taggart, H., Nivens, A. & Tillman, P. (2015). Delirium: Why are nurses confused? *MedSurg Nursing*, 24(1), 15-22. [permalink](#) (Links to an external site.)

- Locate the literature review section. Summarize using your own words from one of the study/literature findings. Be sure to identify which study you are summarizing.
- Discuss how the author's review of literature (studies) supported the research purpose/problem. Share something that was interesting to you as you read through the literature review section.
- Describe one strategy that you learned that would help you create a strong literature review/search for evidence. Share your thoughts on the importance of a thorough review of the literature.
