

### Question 1

2 / 2 pts

I have carefully reviewed the instructions, templates, and rubrics for each of the four parts of the Direct Care Project.

True

False

### Question 2

2 / 2 pts

For the Direct Care Project, identify a target population of RNs in a clinical setting that is unaware of the benefits of certification on patient outcomes and leadership skills. Describe your general target population below including setting. Population needs to be two or more RNs. *\*Names are not needed.\**

Your Answer:

Certification: Certified Medical-Surgical Registered Nurse (CMSRN®)

Target population: Med Surg nurses practicing their skill set in a Med-Surg unit in the hospital, outpatient, homes

Setting: Medical surgical unit

### Question 3

2 / 2 pts

For the Direct Care Project, identify an appropriate clinical certification for your selected target population. Describe the clinical certification below.

Your Answer:

Medical-surgical nursing is the largest nursing area and the world. Medical-surgical nurses provide care to adults with various medical issues and those who are recovering and preparing for surgery. Med Surg nurses have a broad learning ground and are proficient in their approach. Medical-surgical nurses have progressive prioritization, assessment, organizational, and communication skills. They are leaders in blending care among the interprofessional health care team. It is an ongoing challenge to provide
