

Introduction

Greetings Professor and Class!

My name is Jessica Greichunos and I reside in Northwest Indiana; about 20 minutes from Chicago where I've been born and raised. I've been a registered nurse going on 6 years now. My career started from the bottom, (literally) as I went from a CNA to an LPN then RN with an ADN and finally completing my BSN. I'm working 2 completely different jobs but in love with both: one is in a community emergency department in a local hospital and the other is at a Med Spa as an Aesthetic Nurse Injector. I have an amazing 4 yr. old son whom is the rhyme to my reason. From this course I expect to learn about evidence I can apply to my practice that will allow me to provide a safe exceptional care for my patients. My long-term educational goal is to earn my MSN and become an NP, so this is just the next step for me. My hobbies include working out, meditation, listening to music and podcasts as well as traveling. Looking forward to learning with you all.

-Jessica G.
