

Week 1: Introductions (not graded, but required)

No unread replies.77 replies.

Welcome! Please introduce yourself to the class. Tell us about your family, personal interests,

future goals, and whatever else you'd like to share! Also include the following information: 1)

last time you took a pathophysiology course; 2) concepts you feel that you have mastered and 3)

concepts that seem more challenging to you and 4) share one way that you have utilized a

pathophysiological concept in your clinical practice to care for your patient.
