

First and foremost, I love this class. I feel like I am finally learning things that will help become an exceptional NP. Now with that being said, this is ALOT of information. I find myself very intrigued in learning and figuring it all out. I like the edapt modules more than anticipated. They seem to hit the highlights and have good learning checks. As excited as I am about this class, I am nervous about the midterm and final due to all in the information. Thank you for all the resources, study guide, and videos to help us along the way!
