

## Week 5 Weekly Group Study

### Discussion

#### Overview

This is an ungraded discussion forum designed to help you interact with your peers in a group learning environment. Write one exam style question from this week's content to support the study of concepts presented. It is recommended that you use the study guides provided in Week 4 to develop a question related to this week's content.

\*\*\*Disclaimer: Questions should be reviewed by the group for correctness.

A 56-year-old male client presents to the clinic with complaints of abdomen pain. When the NP asks about the quality of the pain, he states it is achy and difficult to pinpoint. The NP knows that this type of abdominal pain refers to:

- A: Somatic pain
- B: Visceral pain
- C: Neuropathic pain
- D: Referred pain

**ANS: B**
