

## NR 546 exam 2 review

The Week 8 exam (final) covers content from weeks 5-8. All content presented in lectures and within required readings and viewings may be evaluated on this exam.

In preparation for the midterm exam, I offer the following General Study Tips and Recommendations:

- Topics and content on study guides are intended to focus student attention when reading/studying.
- Multiple test items are derived from the same topic areas to encourage deeper comprehension. All test items are multiple-choice or matching
- Students must have a broad understanding of content and not simply memorize passages in textbooks or articles.
- All exam questions are written at a high level of comprehension. You are expected to analyze, synthesis, and evaluate all client scenarios in order to answer the questions.
- Read all the answers BEFORE reading the stem of the question. This will help you focus on the key content and not get distracted by extraneous information.
- Concepts listed in the study guide corresponds to the titles of lectures.

	Concepts
<p>Week 5: Medications for Mood Disorders</p>	<ul style="list-style-type: none"> <li><input type="checkbox"/> neurological basis for mood disorders</li> <li><input type="checkbox"/> unipolar depression               <ul style="list-style-type: none"> <li>o Major Depressive disorder                   <ul style="list-style-type: none"> <li><input type="checkbox"/> medications                       <ul style="list-style-type: none"> <li><input type="checkbox"/> SSRI</li> <li><input type="checkbox"/> SNRI</li> <li><input type="checkbox"/> NDRI</li> <li><input type="checkbox"/> SARI</li> <li><input type="checkbox"/> other antidepressants in lecture</li> <li><input type="checkbox"/> TCA</li> <li><input type="checkbox"/> MAOI</li> </ul> </li> <li><input type="checkbox"/> antidepressant prescribing pearls</li> <li><input type="checkbox"/> newer treatments</li> </ul> </li> </ul> </li> <li><input type="checkbox"/> bipolar depression                   <ul style="list-style-type: none"> <li>o medications                       <ul style="list-style-type: none"> <li><input type="checkbox"/> mood stabilizers</li> <li><input type="checkbox"/> antipsychotics</li> <li><input type="checkbox"/> antidepressants</li> </ul> </li> <li>o prescribing pearls</li> </ul> </li> </ul> <li><input type="checkbox"/> lifespan considerations</li>
