

NR 667 Week 1 Discussion: Part 1, Part 2, Part 3

- **Part 1:** Using Brown and Olshansky's (1997) model, describe what interventions you plan to do during your first year of practice to help you navigate the changes described during in each phase.
- **Part 2:** We are seeing rapid change in primary care as stakeholders are demanding higher quality healthcare at reduced costs. After reading the Cuenca (2017) and Shi, et al. (2017) articles, provide a synthesis-level evaluation of how you believe the patient- centered medical home and value-based payment models will: (1) impact your personal practice as a nurse practitioner, and (2) transform the way primary care is delivered in the United States.
- **Part 3:** After reading the AANP (2015) and White, et al. (2017) articles, what are your thoughts on the economic benefits of using nurse practitioners in healthcare practices? How would you respond to this question if asked in a job interview? Support your response in Part 3 with evidence from the literature.

Part 1: Using Brown and Olshansky's (1997) model, describe what interventions you plan to do during your first year of practice to help you navigate the changes described during in each phase.

Laying the Foundation- Part of this phase after school it is important that we as students need to take a little mental break and sort of make up for the time spent during school to focus on themselves, family, and social life. For me, I am leaving for Mexico, with my husband and our 2 boys on April 7th and we are going to enjoy a week on the
