

NR 703 WEEK 4 DISCUSSION

Leading through innovation

1. Create an environment that fosters innovation and creativity. The ability to actively seek and develop new methods, technologies, and tools to promote health, prevent diseases, improve the quality of care of patients, and apply innovation to work through teamwork and reasonable support channels is nurses' innovation ability (Yan et al., 2018). As nurses, we are critical thinkers on the front lines of care delivery who often innovate by identifying more efficient processes that we use to improve clinical practice. Gao et al. (2020) explain how we use those ideas to improve medical service quality, increase job productivity, improve the effectiveness of treatment, reduce healthcare costs while satisfying the needs of patients, improve the effectiveness of care services, improve access to healthcare services and simplify the process involved in delivering such services.

To create an environment that fosters innovation and creativity:

- Provide essential resources that can benefit being creative, such as access to literature and using technology to research and experiment.
- Encourage the chance for continuous education by providing resources for developing professionally
