

IHUMAN HINTS, TRICKS, AND TREATS!

Based on the Puzzlement of the M.W. Influenza case.

For your sanity and peace: DO NOT OVERTHINK THIS THING; YOU WANT A GOOD SCORE AND YOU WILL GET ONE BY THINKING AND NOT WORRYING

If you are browsing the web to get hints on any ihuman patient and discover the diagnosis, please do not think you have it in the bag because you do not! There are steps that are measured for a grade that you cannot overlook. You must follow the steps, do as you are instructed, and NOT jump to a diagnosis conclusion; that will diminish your grade.

If you are allowed to practice on a patient, I strongly suggest that you do. The lightbulb will soon come on.

History Taking

General for everyone (Put this in the question box for the expert's way of asking)

- How can I help you?
- Any other symptoms
- Dizziness, fainting xxx, xxx, xxx
- Allergies
- Prescription meds
- OTC meds or herbal
- Any pain anywhere
- If anything is painful, scale it
- N/V, diarrhea, constipation, bright red or dark stool, or emesis

If it is infectious,

- Have been around anyone sick
- Preventative vaccinations
- Covid
- Flu
- Shingles
- Pneumonia

For each symptom ask

- When did _____ start?
- Events surrounding the symptom
- Does anything make it better or worse?
- What treatment they have for it
- Scale the pain
-

Preventative screenings

- Colonoscopy
- Mammogram
- Immunizations
- PSA
- Bone density test

Specific to ailment or CC (think!)

Add key findings to subjective and objective list
