• Question 1

1 out of 1 points

A 19 year old basketball player complains of itching in the crural folds, buttocks, and upper thighs. The lesions are well demarcated and are half-moon shaped. The area is red, irritated, and there are small breaks in the skin from scratching. What is this patient's diagnosis and how should it be treated?

Selected Answer:

a.
Tinea cruris; treat with a topical antifungal cream

Answers:

- a.
Tinea cruris; treat with a topical antifungal cream
- b.
