

6541 Week 7 iHuman i-Human GI 18-month-old

Questions and Responses

How can I help you today?

She has been vomiting and having diarrhea in her diaper for two days. She doesn't really want to eat anything either and I'm pretty worried. Her sister had similar symptoms last week, especially the diarrhea, but she got better within 2 days. She also goes to daycare but the teachers have said that no other children have had symptoms like this.

Is anyone else having similar symptoms?

Her sister had similar symptoms last week, especially the diarrhea, but she got better within 2 days. She also goes to daycare but the teachers have said that no other children have had symptoms like this.

Has she had any fevers?

Nope

Has she had chills?

She doesn't have that problem

Has she had diarrhea like this before

No

What were the events surrounding the start of the diarrhea?

I started two days ago. She started vomiting as well, and right beginning she had diarrhea just watery and running. She is also really irritable and refusing food. She is taking PLA at some milk

How quickly does the diarrhea come on?

I'm not sure how to answer that. It's just been for the last two days, and its watery poopy diapers

Does anything make her diarrhea better or worse?

Not really

What treatment has she had for her diarrhea

None

How severe is her diarrhea.?

Moderate I suppose..

Is there any change in the shape of her stools?
