Status	Completed
Attempt Score	30 out of 30 points

Question 1

Zollinger-Ellison syndrome causes high levels of acid production in the stomach.

- True
 False

Question 2

Pityriasis rosea is described as having a Christmas tree–like pattern.

- True
 False

Question 3

Mike is a 56 y/o male who lives in an abandoned building with about 40 other people who are homeless. He comes to the clinic with a social worker who describes his symptoms as: a cough, dyspnea, pleuritic chest pain, fever and tachypnea. In your physical exam, you learn that he has some consolidation in the lower lobes with an audible friction rub. To treat Mike's problem, the most appropriate pharmacological agent would be:

- Levofloxacin

Macrolide

Cefoxitin

- Moxifloxacin

Question 4

Judy, a 28 y/o, presents to the clinic with a fever, vaginal discharge, and pain in the lower abdomen, pelvis, and lower back. These symptoms are accompanied by chills, nausea, and vomiting. Differential diagnoses for Judy's diagnosis would include which of the following:

- Ectopic pregnancy
 Ovarian cyst
 Acute appendicitis
