

Question 1

1 / 1 pts

Sam is a 19 y/o male who comes to the clinic with a chief complaint of several weeks of fatigue and non-productive paroxysmal coughing. He initially had a sore throat, some rhinitis, and low-grade fever. Treatment of Sam's condition includes which of the following:

- A. Doxycycline
- B. Azithromycin
- C. Tessalon Perles
- D. All of the above
- E. A & B only

Correct!

Question 2

1 / 1 pts

Artie is a 21 y/o male who comes to the clinic with a chief complaint of paroxysmal coughing without an apparent cause. He states that this has been going on for about 15 days. He initially had a mild fever and a runny nose. First-line treatment for Artie would include macrolides.

- True
- False

Correct!
