

Hello, Everyone!

My name is Cynthia Apodaca. I am 26 years old and live in Yuma, Arizona. I graduated nursing school in May. I plan on staying here in Yuma because most of my family is here and Mexico, so I want them to be close. I am very excited about learning more about how I can implement my knowledge and skills in the community, especially with the Hispanics/Latinos since Yuma has a wide variety of Spanish speaker patients, and not enough nurses to help. Challenges? I would say time management. I want to pursue a Master's Degree in management and Leadership to make a change in my hospital. English is not my first language, so I may have a little hard time writing my assignments. Overall, I am very excited about this class and to interact with you all!
