

## **Topic 4 DQ 2**

Select two different nursing theories and describe how they relate to patient care. How could you use them for inciting behavioral changes? Discuss the pros and cons of applying each theory and how they could be integrated into your future practice. Are there any particular ethical issues related to the integration of these theories that should be considered?

In response to your peers, cite a study that used one of the nursing theories you discussed. Explain the impact of the nursing theory on your approach to patient care. Cite at least one source to support your response.
