Summary of Current Course Content Knowledge

Academic engagement through active participation in instructional activities related to the course objectives is paramount to your success in this course and future courses. Through interaction with your instructor and classmates, you will explore the course material and be provided with the best opportunity for objective and competency mastery. To begin this class, review the course objectives for each Topic, and then answer the following questions as this will help guide your instructor for course instruction.

1. Which weekly objectives do you have prior knowledge of and to what extent?
2. Which weekly objectives do you have no prior knowledge of?
3. What course-related topics would you like to discuss with your instructor and classmates? What questions or concerns do you have about this course?

There are quite a few objectives that I am familiar. For instance leadership and management surrounds all of nursing, as does informatics. So there are instances where nursing requires interactions with leadership and management, and evaluation of practice. Whether a staff or clinic nurse the impact of day to day nursing is affected by scientific data analysis, use of electronic technologies for providing and documenting care, and evaluating the effectiveness of these practices. What I do not have explicit knowledge is the process of healthcare policy at a higher level than a hospital. During my time in the military I participated in developing policy and its integration and implementation within the hospital setting. I have also had the privilege of being within leadership and management positions, although it was not long term desire I was able to witness and be part of the importance it holds for nursing.

At this time I do not have any questions or concerns regarding the topics however, I do look forward to discussions and dialogues with everyone.

Class Introductions

Take a moment to explore your new classroom and introduce yourself to your fellow classmates. What are you excited about learning? What do you think will be most challenging?

DQ1

Consider the evolution of the U.S. health care system. Discuss how the shift to value-based health care has impacted delivery of care and the role and responsibilities of the advanced registered nurse. Project what major evolving trends in the health care delivery system will affect nursing practice and how advanced registered nurses will influence the direction of health care.
