• Question 1

0 out of 0 points

When completing this exam, did you comply with Walden University's Code of Conduct including the expectations for academic integrity?

Selected Yes
Answer:

• Question 2

1 out of 1 points

One member of a therapy group had been quiet for the first several sessions. The member revealed to the other members feeling of depression and emptiness. This week, the member was full of energy and talking very quickly. The member became irritated with another member tried to interrupt, started yelling, and then broke into a fit of laughter. Based on the situation, what can the PMHNP determine about the member?

Selected B.
Answer: The member is exhibiting bipolar behaviors.

• Question 3

1 out of 1 points

The PMHNP conducts a specialized individual interview with a patient named Sandy. During this interview, Sandy expresses her want of the other members to like her, and she has a deep dread for the first group meeting. How does the PMHNP correctly interpret Sandy's interpersonal circumplex?

Selected B.
Answer: Sandy is likely to view members of the group as friendly.

• Question 4

1 out of 1 points

A PMHNP has been holding group therapy sessions for several weeks and notices that a patient is timid and predictable in his or her responses. When the patient does speak, he or she avoids saying anything to contradict anyone in the group. Based on this information, what is an appropriate question the PMHNP should ask herself?
