

## **WK5 Comprehensive Psychiatric Evaluation Presentation**

My name is [REDACTED], I am the Psychiatric mental health nurse practitioner for Ms. A.B. and I will be presenting her case today

**CC (chief complaint):** Her CC is " I am not doing that well "

**History of Presenting Illness (HPI):** A.B. is a 24-year-old African American female with a history of schizoaffective disorder, bipolar type, and schizophrenia who presents for initial psychiatric evaluation. The patient reports she was referred to this clinic by Houston Behavioral Hospital where she was recently hospitalized for Suicidal Ideation (SI), Auditory hallucination (AH), and paranoia. She was admitted to the hospital on 02/24/22 and discharged on 03/1/22. She mentions that she hears voices, and the voices sound like people she knows. She states she is still hearing voices especially when she is around certain people. She also states the voices sometimes tell her she is half-angel and half-demon; the accusatory voices are also telling her that she will be arrested again; that she is going to hell and that her mom and God are mad at her. She mentions she suffers from the effects of childhood trauma; she states she was sexually abused by an older female. She states she is not proud of some things she did in her past and sometimes worries that the mistakes she made will catch up with her. She states her symptoms started three years ago and are still ongoing. She states she used to be in the assisted outpatient treatment (AOT) program at Neuropsychiatric Center (NPC) 'a while back.' where they provided her with food and helped her with other supplies, but she stopped the program due to unknown reasons. She complains of sleep disturbances and that she has nightmares about her past sexual abuse. She discloses that the medications were moderately effective in improving her AH when she was taking them in the hospital. She reports she has not been taking any of the prescribed medications since leaving the hospital because she cannot afford them due to her unemployment
