

Week 3: Focused SOAP Note and Patient Case Presentation

College of Nursing-PMHNP, Walden University

NRNP 6665: PMHNP Care Across the Lifespan 1

Practicum

Introduction

Every patient's treatment begins with a full health assessment, because the plan of care and every mental intervention are all dependent on the information gathered at the initial meeting with the patient. In this situation, the assessment was documented after the patient was evaluated, and a diagnostic impression was formed based on the information gained from the patient during
