

Academic engagement through active participation in instructional activities related to the course objectives is paramount to your success in this course and future courses. Through interaction with your instructor and classmates, you will explore the course material and be provided with the best opportunity for objective and competency mastery. To begin this class, review the course objectives for each Topic, and then answer the following questions as this will help guide your instructor for course instruction.

1. Which weekly objectives do you have prior knowledge of and to what extent?
2. Which weekly objectives do you have no prior knowledge of?
3. What course-related topics would you like to discuss with your instructor and classmates? What questions or concerns do you have about this course?

Looking through the next seven weeks I can say that I do not have any knowledge on any of the topics to come. I am looking forward to learning about each one as my love for learning has become one of my favorite things to do. This being my fourth course as a college student brings pure joy to think I have made it this far. One of the topics I saw that I would be interested in talking about with my instructors and classmates would be Lifespan Development. The life age in my family is not long and learning how that may change or if it is something that I have to deal with. When it comes to questions and concerns that I have for this course, the only thing I can think of would be what will I be taking from this course as a whole? After seven weeks what will be the main thing I will incorporate in my everyday life after taking the course.
